This is a **\SubItem**, which has no bullet. Note the alignment with the **\BulletItem** above.

This is an **\Item**, which has no bullet. Note the alignment with the **\BulletItem** above.

This is a **\SubItem**.

[16] This is a `\NumberedItem`. Note the alignment with the `\SubBulletItem` above.

[6] This is a `\NumberedItem` with a `\CharSpace` in its argument for padding shorter numbers. Note the alignment with the `\NumberedItem` above.

- New Lines and Paragraphs

- To create a new line within the same paragraph (i.e., with the same indentation), use `\newline` instead of `\\`. The latter will not work because it breaks the long table.
 - To create a new paragraph, use `\par` or simply leave an empty line. Paragraph indentations (from `\Item`, `\SubItem`, `\BulletItem`, `\SubBulletItem`, etc.) do not carry across different paragraphs.
- Vertical Spacing Between Items
- Use `\Gap` or `\GapNoBreak` to insert a small vertical space between items within the same section.
 - Use `\BigGap` or `\BigGapNoBreak` to insert a bigger vertical space between items within the same section.
 - The “NoBreak” versions prevent page breaking.
- Dates
- Use `\DatestampYMD{YYYY}{MM}{DD}`, `\DatestampYM{YYYY}{MM}`, and `\DatestampY{YYYY}` to specify dates.
 - Change the definition of `\DatestampFormatSelection` to adjust how dates are displayed throughout the document (e.g., “2010-12-31”, “Dec 2010”, “December 2010”, “2010”).
